

Hanita SolarZone

High guest comfort –
low HVAC cost

SOLARZONE ENSURES GUEST COMFORT WHILE UPGRADING YOUR HOTEL'S EXTERIOR

SolarZone window films transform your hotel by turning sun-baked lobbies, overheated atriums, blinding picture windows and troublesome hot-spots into cool and comfortable interiors.

Available in a wide spectrum of finishes, from cool silver to subtle smoke, these beautiful films can provide a full-scale, aesthetic upgrade to your hotel's exterior – or preserve its original appearance with virtually indiscernible, heat-rejecting film.

SolarZone can be installed quickly and easily with no disruption to guests or hotel operations. And with SolarZone, you receive a low-cost HVAC upgrade that delivers energy efficiency and cost savings from day one.

Lobby / Restaurant

SolarZone eliminates glare and hotspots in your lobby or restaurant, enabling guests to enjoy their stay to the full – both night and day. And when security is a concern, our SafetyZone solutions combine break-in or blast protection with energy efficiency.

Rooms

Now, room curtains can stay wide open while temperatures remain enjoyably low. Guests will love how filtered sunlight keeps rooms bright but cool; you'll love the lower HVAC costs. And, with less UV radiation, you preserve the lifespan of furnishings and flooring.

Gym

Where glass safety is an issue, Hanita's window films are the answer. With a wide range of options, SolarZone Safe's anti-fragmentation solutions meet the unique challenges of each location, while rejecting heat and glare for enhanced comfort.

Health Spa / Beauty Parlor

Adding privacy and designer elegance to doors, windows and room dividers, SolarZone's selection of matte-white film finishes gives a translucent sandblast effect – the ideal touch for beauty parlors and health spas.

Convention Center / Conference Room

SolarZone high-performance window films enable you to provide guests with today's most modern, energy-efficient meeting rooms. Hanita's high-tech solutions keep large spaces cool, comfortable and glare-free, while keeping HVAC costs to a minimum.

Patio / Pool Skylights

SolarZone's unique SkyLite solutions reduce solar energy by up to 80%. These advanced films, developed for glass or plastic glazing, keep roofs transparent and allow light in, while keeping glare, harmful UV radiation and infrared heat buildup out.

SolarZone, the complete turnkey solution for a glazing upgrade, is today's most economic way to improve a building's functionality, provide significant long-term energy savings and ensure a swift return on investment. By cutting heat buildup, SolarZone enables you to improve the operational efficiency of HVAC equipment, enhance your green rating and save up to 20% of energy costs.

The SolarZone ee Program

Working closely with global leaders in the field of advanced energy efficiency, Hanita Coatings has developed a unique turnkey solution for upgrading existing commercial glazing - the SolarZone ee Program.

This tailor-made program can deliver:

A comprehensive analysis and savings forecast

Expert guidance on acquiring an upgraded green rating

Quick, professional window film installation

Post-installation tracking and savings verification

SolarZone's unique adhesive window film laminate has been specially designed to upgrade energy performance and enhance your hotel's long-term sustainability. Composed of sophisticated micro-thin polyester film enhanced by Hanita's patented layered coating, SolarZone effectively filters UV, visible light and infrared heat to reduce intrusive solar energy by up to 80%. The result is a cooler interior, reduced load for HVAC systems and significantly lower operating costs.

A WIDE RANGE OF BENEFITS FOR HOTEL OWNERS

Installed with minimal interruption to daily operations, a SolarZone project can pay for itself in 3 years, and then offer an additional decade of non-stop, maintenance-free service

SolarZone can help you to:

1. Cut energy bills by up to 20%
2. Enhance guest comfort
3. Reduce solar heat gain by up to 80%
4. Cool guest rooms and public areas much faster
5. Upgrade hotel's green rating and certification
6. Upgrade hotel exterior with exclusive finishes
7. Disguise unsightly views and features
8. Preserve hotel's original façade with transparent finishes
9. Meet all safety standards for impact-resistant glass
10. Deliver break-in and blast protection

About Hanita Coatings

For 30 years, Hanita Coatings, situated in Kibbutz Hanita, Israel, has specialized in the development and manufacture of engineered polyester films for high-end applications. Hanita is a key provider of energy-efficiency solutions, a market leader in insulation laminates, a developer of core photovoltaic materials and a central player in the field of solar control window film. Hanita also manufactures safety and security anti-fragmentation window films, which add further value to energy-efficiency building upgrades.

Hanita's qualified representatives worldwide are ready to assist you with technical support, advice about energy efficiency, and whole-building modeling and savings forecasts.

Learn more about local incentive plans, green building energy ratings and sustainability regulations for your region by calling your local SolarZone representative.
